PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience in **Core Java**, **OOP**, Collections Framework, Exception Handling, Multithreading, and Design Patterns. Proficient in building **RESTful APIs and microservices using Spring Boot**, Spring Data JPA, Hibernate, and MySQL, with front-end experience in React.js and JavaScript. Skilled in Git version control, Maven, **API testing with Postman**, and writing clean, maintainable code following OOP principles. Strong foundation in Data Structures & Algorithms, database design, and CRUD operations. Passionate about **backend development** and eager to contribute to scalable, secure, and high-performing applications.

SKILLS SUMMARY

Frontend: HTML, CSS, JavaScript, Bootstrap, React.js

Backend: Java, Advanced Java, Spring Boot, REST APIs, Microservices

Concepts: OOP & Design Patterns, Collections Framework, Exception Handling, Java 8 (Streams, Lambda), Multithreading, File Handling, Hibernate, Data Structures & Algorithms

Database: MySQL, JPA, Hibernate

Tools & Practices: Git, GitHub, Maven, Postman, VS Code, Eclipse, SDLC, JUnit (basics), Docker (basics)

EDUCATION

Mahendra Institute of Technology, Namakkal

Nov 2022 – May 2026

B.E. Electronics and Communication Engineering | CGPA: 7.27

INTERNSHIP & TRAINING

Login360 — Java Full Stack Development Training

Mar 2026 – Jul 2026

- Completed hands-on, project-based training in Java, Spring Boot, React.js, REST API, JDBC, MySQL, HTML, CSS, and JavaScript.
- Built and deployed full-stack web applications end-to-end using React.js, Spring Boot, and MySQL.
- Used Git/GitHub for version control and followed Agile/SDLC practices including debugging and code reviews.

PROJECTS

Student CRUD REST API

Spring Boot | REST API | MySQL

- Built a RESTful CRUD API using Java, Spring Boot, Spring Data JPA, Hibernate, and MySQL to manage student records end-to-end.
- Implemented Create, Read, Update, and Delete operations across 5+ REST endpoints, enabling reliable storage and retrieval of data.
- Designed and tested REST endpoints (GET, POST, PUT, DELETE) using Postman, following a layered Controller-Service-Repository architecture.

Banking Management System

Core Java | OOP | File Handling

- Built a console-based Banking Management System in Core Java applying OOP principles (encapsulation, inheritance, abstraction).
- Implemented account creation, deposit, withdrawal, balance enquiry, and PIN verification using file handling as a database alternative.
- Applied exception handling and the Collections Framework to manage data reliably and prevent runtime failures.

Personal Portfolio Website

HTML5 | CSS3 | Responsive Design

- Designed and developed a fully responsive personal portfolio website using HTML5, CSS3, Flexbox, and CSS Grid.
- Structured dedicated sections for Projects, Technical Skills, Education, and Contact Information for easy navigation.
- Improved page responsiveness and user experience through modern CSS styling and media queries.

CERTIFICATIONS

- Java Full Stack Development — Login360 (Training Certificate)
